DON MILNER

Painting Workshops

'The Seascape'

This workshop brings with it many great techniques and skills that are essential to create a successful Seascape painting.

Learn about the various moods of the sea, the colours, clouds, skies, sands and how to mix and achieve a successful painting. Waves and their movements from stormy tempests to calm and serene all require various techniques, colours and painting processes. Discover how to capture brilliant light into your painting and create wonderful depth and perspective using colours and form.

Paint the coastal vegetation and grasses that look like the real thing and in minutes, not hours of frustration and struggle. You will learn how to create an appropriate under painting that will enhance and improve the final colours of your painting. Water that looks like water unyet wild and alive with movement. Mix colours with confidence and learn brush techniques that simplify the process and will give you amazing results.

Create realistic clouds out of glorious clear blue skies, or express the power and fury of a storm at sea as the waves churn and crash with reckless abandon.

- ✓ Learn how to create great waves and translucent water.
- ✓ Capture distance and depth into your painting .
- ✓ Use colour to create perspective.
- ✓ Don is there to help you at every stage of your painting.
- ✓ Many tips and tricks at every stage ..and much, much more..
